Competencies	<ul style="list-style-type: none"> • ---
Decision Making Control	<ul style="list-style-type: none"> • Production and Deployment Code version Management (GitHub/Git/Bitbucket)
Values	
Knowledge	<ul style="list-style-type: none"> • Expertise – we strive for a deeper understanding of CSR domain • Innovation – we aspire to do things creatively
Action	<ul style="list-style-type: none"> • Entrepreneurship – we are empowered to act decisively and create value • Integrity – we are consistent in our thoughts, speech and action
Care	<ul style="list-style-type: none"> • Trusteeship – we protect the interests of our customers, community, employees, partners and shareholders • Humility – we aspire to be the best, yet strive to be humble
Impact	<ul style="list-style-type: none"> • Performance - We strive to achieve market leadership in scale and profitability, wherever we compete. • Resilience - We aspire to build businesses that anticipate, adapt and endure for generations.
<p>Key Roles/Responsibilities:</p> <ul style="list-style-type: none"> • Code Analysis: You must conduct a rigorous analysis of the website or webpage requirements. This involves a brainstorming session with a development team to either come up with ideas for a new site/page or a complete revamp of an existing one. Then you'll need to determine the feasibility of each idea before identifying the best way to proceed. You're also expected to offer details on the site's features and functionalities. • Development & Database Optimization: The next step is to use your technical knowledge to develop the site/page as per the final plan. What you create must be dynamic and include the advantages of PHP Script. A PHP Developer is expected to develop a portal with an optimized database. • Testing: You have to test the site/page for every conceivable error and get feedback from the client. Once you have located errors, debug them and finalize the site/page. After receiving approval, implement the webpage or host the site online. • Maintenance: A PHP Developer's job is not done when the website/webpage has been published! You must update it continuously and alter functionalities from time to time to improve visibility and user experience.
